

# Cannabis for Capitalists eBook Contents – Otoké Horticulture, LLC

Dedication .....	
Foreword .....	1
Introduction.....	2
An Integrated Approach .....	4
Cultural Management.....	5
Pest Management .....	6
Best Management Practices .....	8
Section 1: Pest Management .....	9
Prevention .....	10
Inside Sanitation.....	10
Outside Sanitation .....	10
Exclusion and Filtering .....	11
Economic Thresholds.....	13
Scouting and monitoring .....	13
Routine Scouting Reporting.....	14
SOAP Charting.....	15
Diagnostic Information .....	17
Correct Diagnosis.....	19
Nutrient Disorders.....	23
Tools and Methods .....	24
Controls.....	27
Laws .....	27
Sanitation .....	28
Using Beneficial Insects.....	29
Biopesticides .....	36
Pest control through viruses.....	37
Other controls.....	37
Chemical Pesticides .....	38
Safety and Product handling .....	57
Section 2: Pathogens and Pests .....	60
Pathogens .....	61
Pathogen Control.....	64
Powdery Mildew .....	67

Other Foliar Pathogens.....	70
Fruit (Bud) Disorders .....	72
Molds, Bacteria and Human Health.....	73
Soil-borne Root diseases.....	74
Other issues .....	78
Insects & Arachnids .....	81
Common Pests.....	85
Other Pests .....	100
Non Host Pests.....	111
Section 3: Control, Coercion and Manipulation .....	112
Plant Flow .....	113
Waves and Throughput .....	113
Wave Based Flow.....	116
Management: Command and Control.....	119
Control: <i>Cannabis</i> by the Numbers .....	119
Tools.....	119
Risk Management .....	121
Change Management.....	122
Section 4: Cultural Management & Abiotic Disorders .....	123
Light.....	125
What light does Cannabis respond to?.....	126
How much light is enough? .....	127
How much light do various light sources deliver?.....	128
Light spacing.....	130
Plant reactions to light.....	132
Lighting Checklist.....	132
Carbon Dioxide.....	134
CO <sub>2</sub> implementation.....	134
Checklist for Carbon Dioxide .....	135
Temperature and Humidity Control .....	136
Source Water Quality .....	138
Propagation .....	140
Cuttings .....	140
Mothers and Donors.....	141
Taking Cuttings .....	143
Preparing cuttings for “the Stick” .....	143

Weaning newly rooted cuttings off humidity .....	145
Growing out the cuttings .....	146
Root Assessments.....	147
Ruthlessness .....	148
Propagation by Tissue Culture .....	148
Media .....	149
Media Content.....	149
Media preparation .....	153
Container Size .....	155
Plant Sizing and shaping .....	157
Plant Hormones – Shape and Size Levers .....	158
Creating specific shaped Plants.....	159
Section 5: Nutrition, pH & Fertilizers.....	167
What are Plant Nutrients? .....	168
Where do nutrients come from?.....	169
Plant Nutrition happens in the Root Zone.....	170
Solubility, availability, tie-up and lock-out.....	174
What levels of nutrition are required for <i>Cannabis</i> ?.....	176
A quick tour of nutrient by growth phase .....	177
Analysis of Commercial Nutrient Systems.....	178
Nutrient mimics.....	178
How does your liquid nutrient scheme stack up? .....	180
Nutrient Measurements .....	183
EC/TDS Measurement .....	183
pH Measurements .....	186
Lab analysis of nutrients and pH.....	188
Water-Soluble Fertilizers .....	196
A Primer on Nutrient Salts .....	196
Complete Water Soluble Fertilizers .....	197
Micronutrients and Chelation.....	197
Nutrients - the Otoké Way.....	199
Otoké Two Level Nutrient Formulations .....	201
Organic Nutrient Delivery Systems .....	219
Developing an Organic Nutrient Delivery system.....	222
Water and Nutrient Delivery .....	223
Water Application.....	225

Irrigation Leaching.....	226
Water delivery systems .....	226
Stock Solutions and Nutrient injectors.....	228
Fertigation/Irrigation Controls .....	229
Putting it all together:.....	231
Test Water Characteristics:.....	232
Hydroponics .....	238
pH management in hydroponic operations .....	238
Soilless Systems.....	240
Appendix A: pH and EC/TDS basics .....	248
Appendix B: Non-direct pH and EC measurement techniques for on-site media testing.....	251
Appendix C: Alkalinity testing and treatment procedures .....	254
Appendix D: How to read a Water Soluble Fertilizer label .....	256
Appendix E: Water soluble fertilizer mixing calculations .....	259
Appendix F: Nutrient formulations.....	261
Appendix G: Nutrient Disorder Visual Symptoms .....	269
Appendix H: Worker Protection.....	274
Restrictions for Worker Entry into Treated Areas .....	275
Spray Application Safety .....	275
Product Fate after application .....	278
Product mixing and loading .....	278
NFPA 704 Signs .....	278
Exposure and Pollution Protection.....	279
Chemical Handling Checklist .....	280
Fertilizer / Chemical Storage and Safety .....	281
Chemical Safety and Storage Checklist.....	281
Personal Protective Gear.....	282
Emergency Response Procedures .....	283
Spills and contamination.....	283
Ergonomics .....	286
Appendix J: Propagation by Seed .....	288
Appendix J: Trials .....	294
Trial Basics.....	294
Sample Sizes .....	295
Trial Plant shaping and Veg Period.....	295
Care during the trial .....	296

Data .....	296
Glossary .....	298
Reading List and References.....	304
About the Authors .....	314
Epilogue: RIP Mary Jane Superweed .....	316
